OUR PRODUCTS

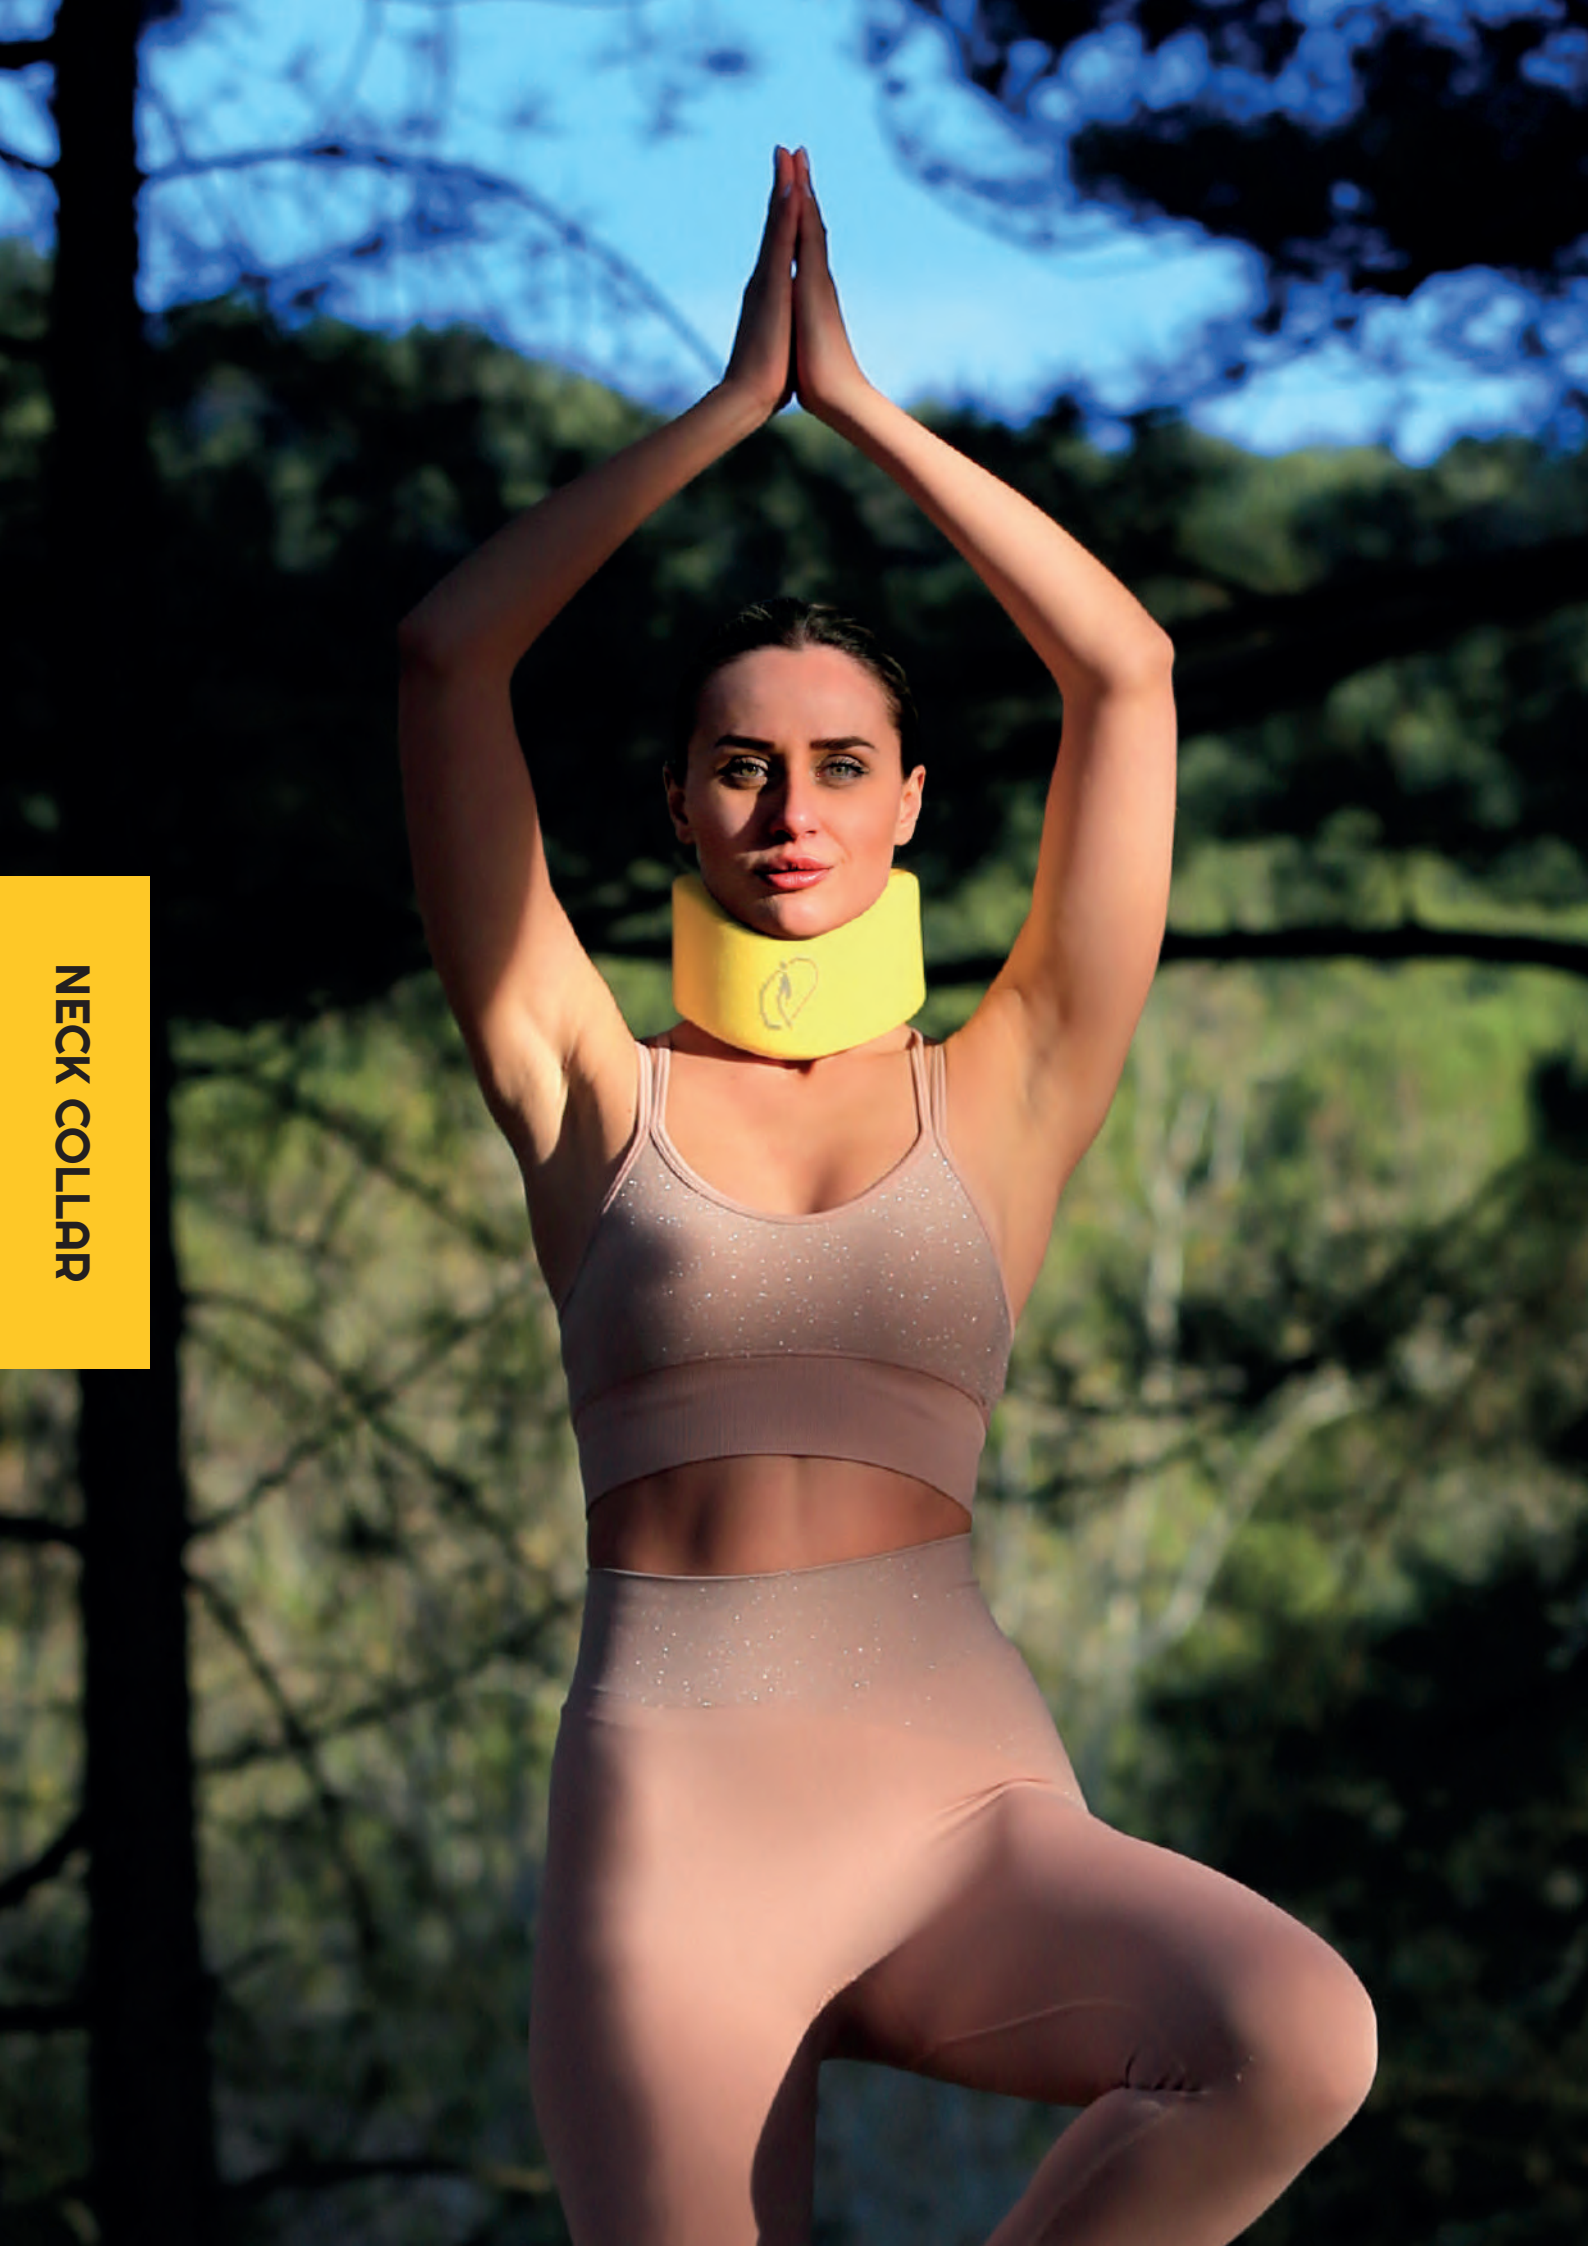

In 2001, Morsa Cyberg Orthopedics started its production activities of the Soft Orthopedic in Turkey, with years of production experience to many countries worldwide offers a high-quality range of product.

With years of production expertise, the company now offers a high-quality assortment of products to various countries worldwide. As a pioneer in the field, Morsa Cyberg Orthopedics has established a significant presence in the market it serves today, renowned for its quality and customer satisfaction. Under the Morsa Cyberg brand, a leading name in the medical orthopedic industry, the company offers more than 200 types of products, including corsets, knee supports, cervical supports, wrist and ankle supports, foot health products, as well as other orthoses and splints.

We believe that health is the most valuable asset in life, and we maintain this awareness throughout every stage of our design and production processes. Our aim is to achieve sustainable growth in the global medical market by offering innovative, high-quality products that prioritize healthy and functional solutions, thereby ensuring high customer satisfaction. Please visit our products page to review our inventory, and do not hesitate to contact us if you are unable to find what you are looking for.

Morsa Cyberg

NECK COLLAR

REF-12.103

CERVICAL ORTHOSIS (SPONGE)

S - m - L - XL - XXL

- Relieves painful conditions of the neck by restricting cervical spine movement to specific angles.
- It can be applied in cases of neck hernias (cervical disc herniation), cervical osteoarthritis, and cervical muscle pain.

	S	m	L	XL	XXL
	34-36 cm	36-38 cm	38-40 cm	40-42 cm	42-44 cm

REF-12.102

CERVICAL ORTHOSIS (FOAM)

- Provides limited cervical motion control and relieves the mild neck pain by limiting the cervical spine motions.
- Used in the treatment process of the disk hernia cervical osteoarthritis and cervical muscle pains.

REF-11.101

CERVICAL ORTHOSIS

- Ideal for chronic neck pain, sports injuries, or minor neck injuries.
- Relieves pain by restricting neck movements. It can be applied in cases of neck hernia (cervical disc herniation), cervical osteoarthritis, facet joint problems, and cervical muscle pain.

S
M
L

REF-12.108

CERVICAL ORTHOSIS (TRACHEOSTOMY-OPEN)

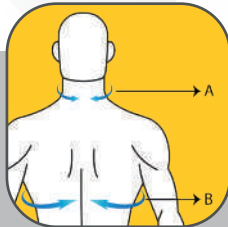

- Provides complete restriction in neck movements following neck traumas and cervical disc herniation.
- Offers stabilization for cervical spine fractures and relieves pain from muscle strains.
- Supports a weakened or injured neck and aids in pain relief.

S
M
L

REF-12.104

CERVICAL ORTHOSIS (PHILADELPHIA TYPE)

- Provides complete restriction in neck movements following neck traumas and cervical disc herniation.
- Offers stabilization for cervical spine fractures and relieves pain from muscle strains.
- Supports a weakened or injured neck and aids in pain relief.

	A	B
S	34 36 cm	70 90 cm
M	36 38 cm	90 110 cm
L	38 40 cm	110 130 cm

REF-11.105

CERVICAL MINERVA ORTHOSIS (CTO)

- Used to provide traction for the weight of the head with trunk support and to restrict neck movements following fractures, dislocations, ligament injuries in the cervical region, and surgical operations of the cervical spine.

S	45 50 cm
M	50 55 cm
L	55 60 cm

REF-13.110

NOSE PROTECTIVE MASK

- It is used before/after nose surgery (Rino Plasti operation), nose injuries or zygomatic (cheekbone) fractures.
- It can be used to avoid any impact in sports activities that do not use a helmet.

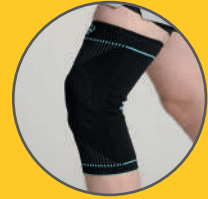

KNEE SUPPORT

REF-20.402

KNEE SUPPORT KNITTED WITH FLEXIBLE STAYS
 S - M - L - XL - XXL

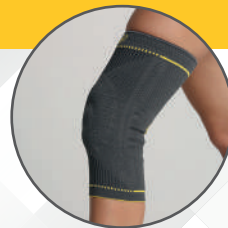

- It assists in the treatment process for conditions such as knee joint traumas, ligament injuries, osteoarthritis, and meniscus lesions.
- Additionally, it provides support to the patella with the aid of the special silicone pad surrounding the patella.

 S
-
M
-

-
M
-
L
-
XL
-
XXL

REF-20.403

KNEE SUPPORT KNITTED WITH HINGED STAYS (HALF OPEN)

- In cases of strain on the knee ligaments (internal and external ligaments), it offers robust support to the knee joint and aids in the healing process.
- It is recommended for the treatment of strain-sprain, arthritis-bursitis, and tendinitis.

REF-20.405

KNEE SUPPORT KNITTED WITH HINGED STABILIZING

S - M - L - XL - XXL

- In cases of strain on the knee ligaments (internal and external ligaments), it provides strong support to the knee joint and aids in the healing process.
- It is indicated for ligament injuries, soft tissue lesions of the knee, and other knee joint treatments.

REF-20.404

KNEE SUPPORT KNITTED WITH HINGED STAYS (FULL OPEN)

- In cases of strain on the knee ligaments (internal and external ligaments), it offers robust support to the knee joint and aids in the healing process.
- It is recommended for the treatment of strain-sprain, arthritis-bursitis, and tendinitis.

S
M
L
XL
XXL

REF-20.406

KNITTED KNEE SUPPORT WITH FLEXIBLE DOUBLE STAYS

- It assists in the treatment process for conditions such as knee joint traumas, ligament injuries, osteoarthritis, and meniscus lesions.
- It is recommended for the treatment of strain-sprain, arthritis-bursitis, and tendinitis.

S
M
L
XL
XXL

REF-20.111

KNEE TENDON SUPPORT

- It is utilized in the treatment of Osgood-Schlatter disease and patellar tendonitis.

S
-
M
-
L
-
XL
-
XXL

REF-20.100

KNEE SUPPORT CLOSED PATELLA

- It provides warmth and support to the knee area and is utilized in cases of mild traumas and injuries.

S
-
M
-
L
-
XL
-
XXL

REF-20.101

KNEE SUPPORT OPEN PATELLA

- It provides warmth and support to the knee area, aiding in the treatment process for conditions such as knee joint traumas, ligament injuries, osteoarthritis, and meniscus issues.

S
-
M
-
L
-
XL
-
XXL

REF-20.102

KNEE SUPPORT WITH FLEXIBLE STAYS (SHORT)

- It provides warmth and support to the knee area, assisting in the treatment process for conditions such as knee joint traumas, ligament injuries, osteoarthritis, and meniscus injuries.

S
-
M
-
L
-
XL
-
XXL

REF-20.103

KNEE SUPPORT WITH FLEXIBLE STAYS (LONG)

- It is highly effective in supporting the collateral ligaments of the knee and provides complete protection during sports activities.
- It is recommended for the treatment of strain-sprain, arthritis-bursitis, and tendinitis.

S
-
M
-
L
-
XL
-
XXL

REF-20.104

KNEE SUPPORT WITH FLEXIBLE STAYS (HALF OPEN)

- It provides strong support to the knee joint in case the knee ligaments (internal-external lateral ligaments) are strained.
- It helps the treatment process for ligament injuries, soft tissue lesions and other knee joint problems.

S
-
M
-
L
-
XL
-
XXL

REF-20.105

KNEE SUPPORT WITH HINGED STABILIZING

- It offers robust support to the knee joint in cases of strain on the knee ligaments, including the internal and external lateral ligaments.
- Additionally, it aids in the treatment process of ligament injuries, soft tissue lesions, and other knee joint issues.

S
-
M
-
L
-
XL
-
XXL

REF-20.106

KNEE SUPPORT WITH HINGED STABILIZING (HALF OPEN)

- It offers robust support to the knee joint in cases of strain on the knee ligaments, including the internal and external lateral ligaments.
- Additionally, it aids in the treatment process of ligament injuries, soft tissue lesions, and other knee joint issues.

S
-
M
-
L
-
XL
-
XXL

REF-20.107

KNEE SUPPORT WITH HINGED STABILIZING (FULL OPEN)

- It is highly effective in supporting the collateral ligaments of the knee and provides complete protection during sports activities.
- It is recommended for the treatment of strain-sprain, arthritis-bursitis, and tendinitis.

S
-
M
-
L
-
XL
-
XXL

REF-20.108

KNEE SUPPORT WITH PAD

- It safeguards the knee and knee joint from impacts, particularly during sports activities.
- Additionally, it delivers warmth and support to the knee, particularly in cases of patellar (kneecap) and surrounding soft tissue lesions.

S
-
M
-
L
-
XL
-
XXL

REF-20.109

KNEE SUPPORT WITH CROSSED LIGAMENT

- It aids in the healing process by providing support to the knee and straining the knee cruciate ligaments.
- Equipped with a cross velcro band on the front, adjustable in both directions, it prevents excessive stretching of the cruciate ligaments and stabilizes the knee, preventing it from slipping back and forth.

S
T
D

REF-20.110

KNEE TENDON BAND

- It is employed in sports activities and in the treatment of patellar tendonitis and Osgood-Schlatter syndrome.

REF-20.001

WOOL KNEE SUPPORT

- It is effective in situations that require heat and warmth to the knee joint.

KNEE SUPPORT SERIES

ARM-SHOULDER SUPPORT

REF-30.802

KNITTED SHOULDER SUPPORT

S - M - L - XL - XXL 

- It provides warmth and support to the shoulder joint in chronically painful conditions.
- With a silicone pad, it offers external protection to the shoulder.

REF-30.301

ARM SLING (LUX)

 S - M - L - XL - XXL

- It provides excellent fixation to the shoulder and upper arm in humeral fractures and shoulder dislocations.
- It fixes the arm in the desired position and provides arm-shoulder immobilization.

REF-30.304

SHOULDER IMMOBILIZER (VELPAU)

- It provides excellent fixation to the shoulder and upper arm in humeral fractures, post-operative treatments, shoulder subluxation and dislocations, conservative and postoperative treatment of scapula fractures and fissures, soft tissue injuries, Glenohumeral injuries, and operations.

S
T
D

REF-30.305

ARM SLING WITH CUSHION 30 DEG.

- It provides immobilization of the arm at 30 degrees of abduction.
- It is used for post-operative immobilization after treatment of Rotator Cuff and Bankart (recurrent shoulder dislocation).

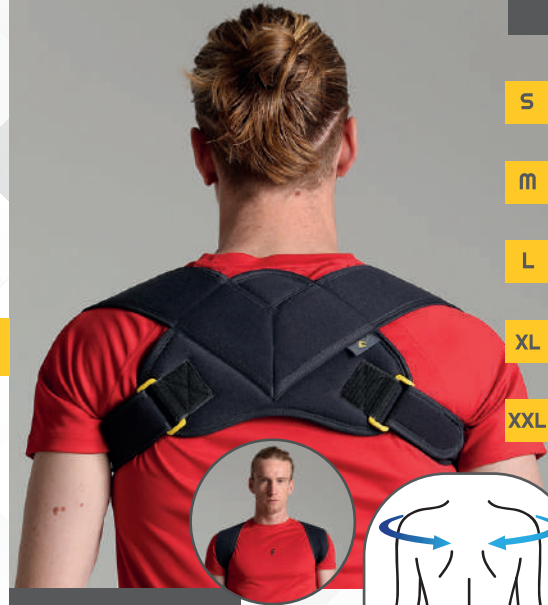

STD

REF-30.306

ARM SLING WITH CUSHION (45-60 DEG).

- It provides immobilization of the arm at 45-60 degrees of abduction.
- It is used for post-operative immobilization after treatment of Rotator Cuff and Bankart (recurrent shoulder dislocation).

S 70-80 cm
 M 80-90 cm
 L 90-100 cm
 XL 100-110 cm

REF-30.311

CLAVICULA BANDAGE

- It is used instead of plaster for fixation of the clavicle bone after clavicle (collarbone) fractures.

S
 M
 L
 XL
 XXL

REF-30.800

SHOULDER SUPPORT

- To the shoulder joint: Provides protection, warmth, and support.
- It is used in chronic painful conditions of the shoulder, during sports activities, and in cases where the shoulder is under heavy stress.

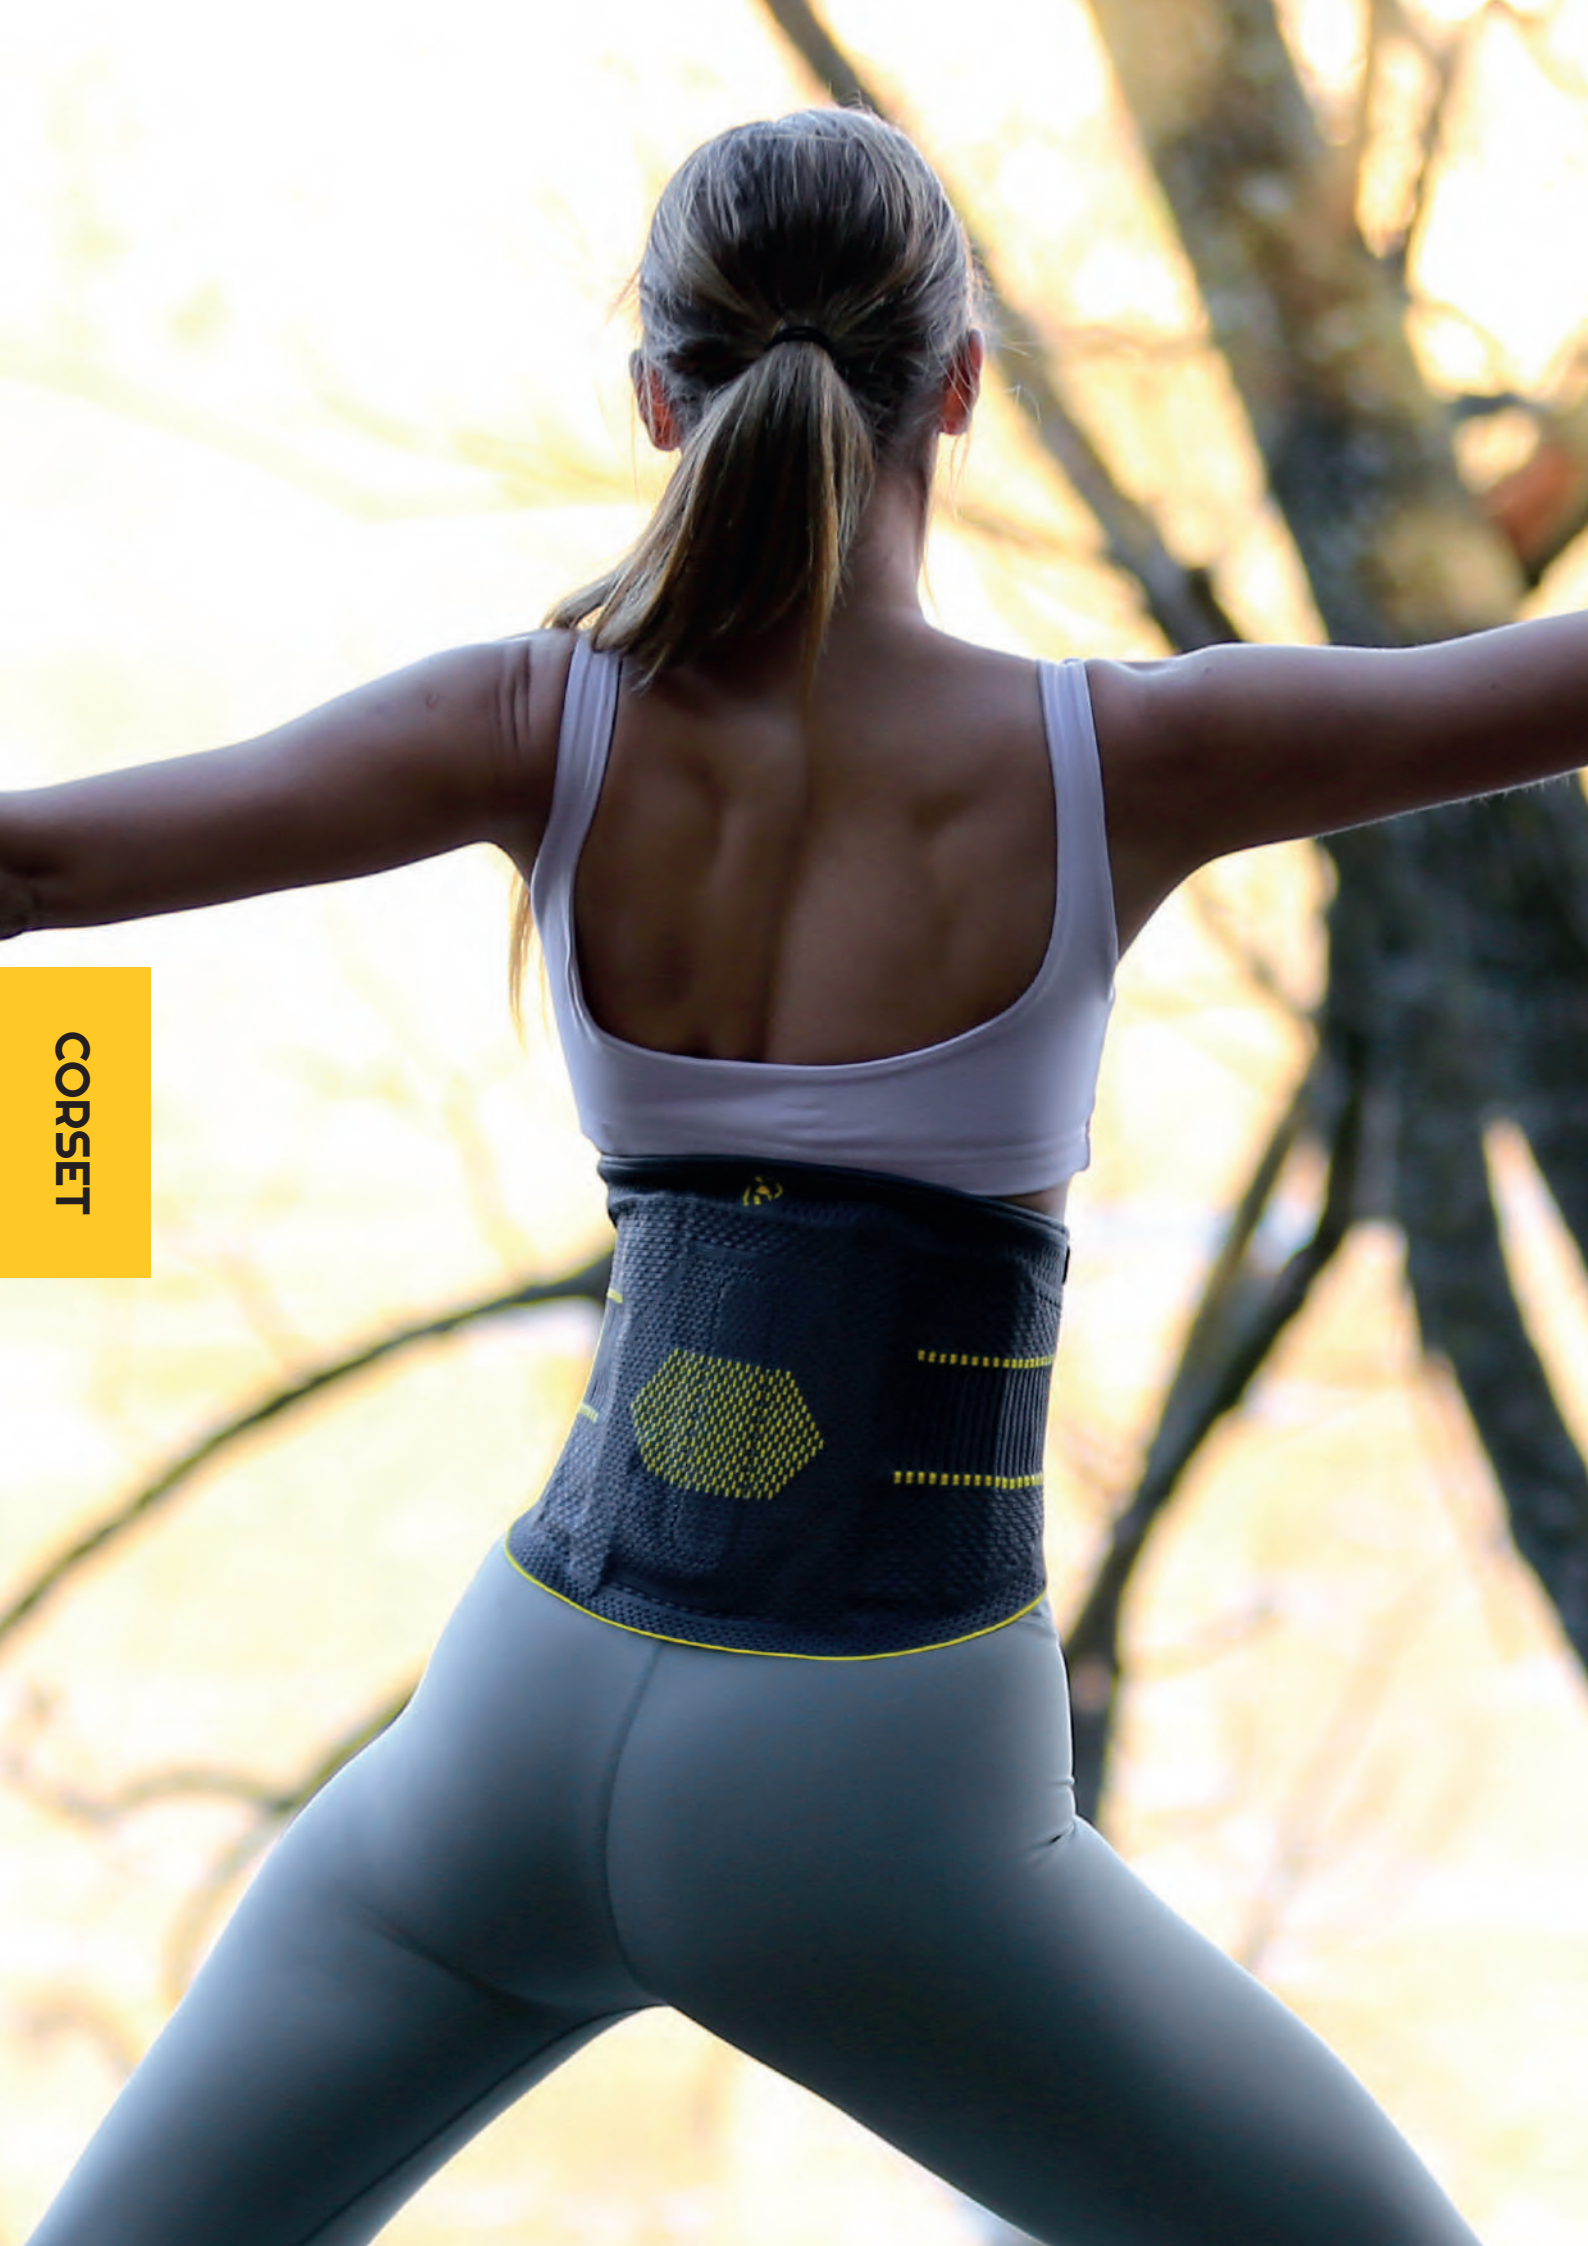

S
 M
 L
 XL
 XXL

REF-30.801

WOOL SHOULDER SUPPORT

- Provides warmth to the shoulder joint.
- Provides light support in sport activities and in chronic pain conditions.

CORSET

REF-40.402

CORSET LUMBO-SACRAL (KNITTED)S - m - L - XL - XXL 

- It offers full support to the lumbar curve with its adjustable triangular silicone pad.
- Additionally, it provides support to the lower back muscles in cases such as lumbago (sudden pain in the lumbar region and excessive muscle tension) caused by problems in the facet junction.

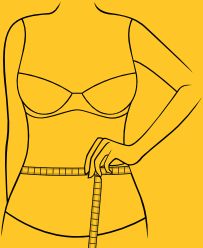

REF-40.407

KNITTED LUMBO-SACRAL CORSET (CROSS BELTED) S - m - L - XL - XXL

- It provides support to the lower back muscles in cases such as lumbago (sudden pain in the lumbar region and excessive muscle tension), particularly in lower back pain caused by problems in the facet junction.

	S	m	L	XL	XXL
	70-80 cm	80-90 cm	90-100 cm	100-110 cm	110-120 cm

REF-40.404

CORSET LUMBO-SACRAL WITH BELT (KNITTED)

S - M - L - XL - XXL 

- It provides support to the lower back muscles in cases such as lumbago (sudden pain in the lumbar region and excessive muscle tension), particularly in lower back pain caused by problems in the facet junction.

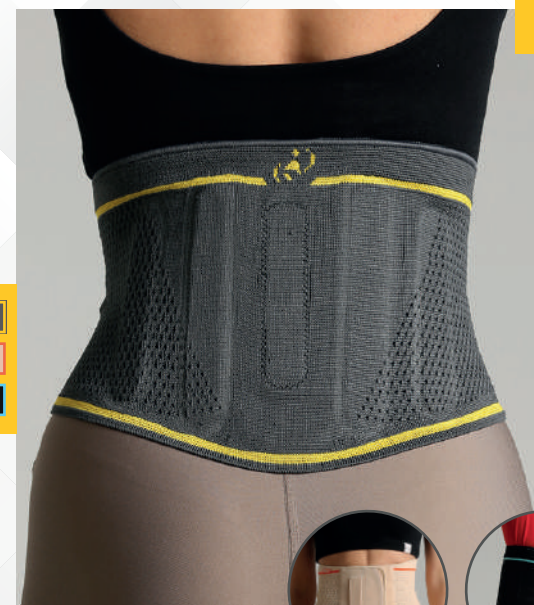

REF-40.405

CORSET SACROILIAC (KNITTED)

- Stabilize the pelvis and lower back and delivers pain relief to the sacroiliac (SI Joint) and pelvis.

S

REF-40.203

CORSET NEOPRENE (ABDOMINAL)

- It offers warmth and support to the abdominal area, providing protection to the lumbar region during exercise and assisting in weight loss in the abdominal region.

S
-
M
-
L
-
XL
-
XXL

REF-40.201

CORSET NEOPRENE

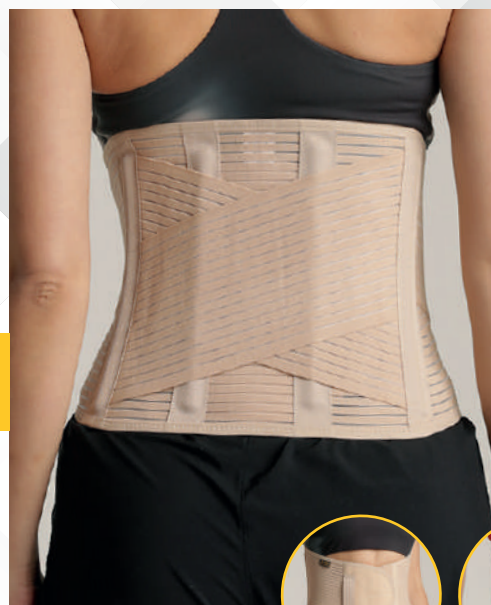

- It provides warmth and support to the lumbar region, aiding in the healing process for rheumatic pains in that area.

REF-40.162

CORSET POSTUREX (PREGNANCY)

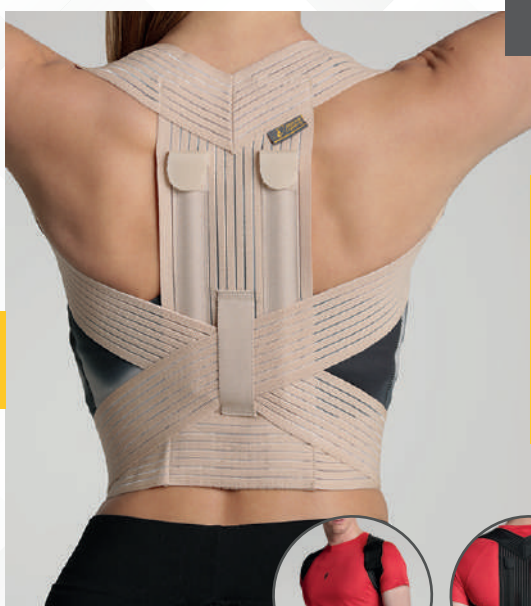

- It offers support to the lower back muscles in cases of lower back pain (lumbago) caused by problems in the facet joints.
- Additionally, it provides support to the sacroiliac region during and after pregnancy.

S
-
M
-
L
-
XL
-
XXL

REF-40.250

CORSET LUMBO-SACRAL WITHOUT BELT

- It offers support to the lower back muscles in cases of lower back pain (lumbago) caused by problems in the facet joints.
- Additionally, it is employed in the treatment of lumbosacral and sacroiliac pain.

S
-
M
-
L
-
XL
-
XXL

REF-40.161

CORSET POSTUREX

- It delivers a corrective and stimulating effect in cases of postural disorders and mild kyphosis. This support aids the waist and back muscles, helping to prevent sagging of the abdomen.

S
-
M
-
L
-
XL
-
XXL

REF-40.163

CORSET POSTUREX FIX

- It provides a corrective and stimulating effect in posture disorders and mild kyphosis. It supports the waist and back muscles and is used to prevent abdominal sagging.

REF-40.291

S
-
M
-
L
-
XL
-
XXL**CORSET LUMBO FIX**

- It supports the lumbar area in lower back pain, aiding in conditions like sciatic nerve issues, spinal stenosis, spondylosis, spondylolysis, spondylolisthesis, degenerative disc disease, post-childbirth, and post-spinal surgery.

REF-40.420

CORSET ABDOMINAL

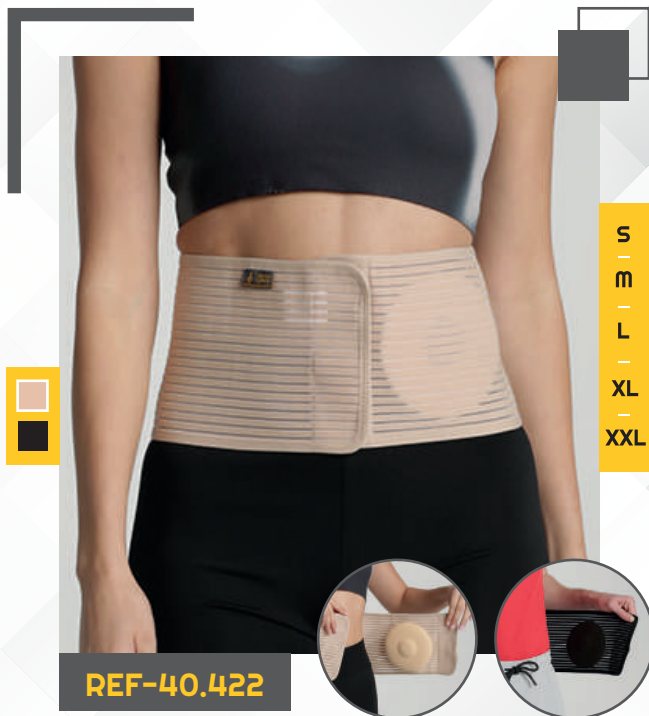

- It offers support to the abdominal region following abdominal operations and helps prevent sagging in the abdominal region after pregnancy.

REF-40.421

CORSET STERNUM

- It provides stabilization in the treatment of sternum fractures and supports the sternum after open heart or thoracic surgery.

REF-40.422

CORSET HERNIA SUPPORT

- In cases of abdominal hernias, it provides support by applying pressure with its special pad, preventing the hernia from progressing.

REF-40.423

CORSET COLOSTOMY

- It is used to reduce the risk of hernia after colostomy surgeries, to protect the colostomy bag and to support the abdominal area.

REF-40.427

S
M
L
XL
XXL**CORSET STERNUM (OPEN)**

- Specially designed for women, it provides stabilization in the treatment of sternum fractures and supports the sternum after open heart or thoracic surgery.

REF-40.439

S
M
L
XL
XXL**CORSET PREGNANCY**

- Appropriate to use during and after pregnancy period to provide support to the sacroiliac area.
- Provides support to the sacroiliac muscles to prevent lower back problems.

REF-44.550

Adjustable
Size**CORSET JEWET HYPEREXTANSION**

- In compression fractures of the vertebra, it aids in stabilizing hyperextension of the vertebral column in the sagittal plane. Additionally, it restricts lateral flexion with its aluminum construction.

REF-44.551

Adjustable
Size**CORSET JEWET HYPEREXTANSION
(3 POINT SUPPORT)**

- Thoracic vertebral body fractures (anterior compression fractures), hyperkyphosis, and osteoporosis treatments are used.
- It maintains the thoracolumbar region in extension and restricts lateral flexion.
- It prevents flexion in lower thoracic and lumbar compression fractures and facilitates the healing process.

ELBOW SUPPORT

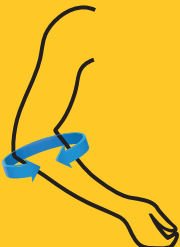

REF-50.304

KNITTED ELBOW SUPPORT

S - m - L - XL - XXL 

- It is used in the treatment of tennis elbow syndrome and epicondylitis.
- With the silicone pad, it provides support to the flexor tendons.

	S	m	L	XL	XXL
	22-25 cm	25-28 cm	28-31 cm	31-34 cm	34-37 cm

REF-50.301

ELBOW SUPPORT

REF-53.015

ELBOW CONTRACTURE ORTHOSIS

- It provides controlled mobilization of the elbow joint.
- It is used in medial and lateral epicondyle fractures, elbow dislocation, and temporary immobilization after elbow arthrolysis.

Adjustable
Size

REF-53.016

ELBOW CONTRACTURE ORTHOSIS (THERMOPLASTIC)

- It provides controlled immobilization of the elbow joint.
- It is used in medial and lateral epicondyle fractures, elbow dislocation, and temporary immobilization after elbow arthrolysis.

WRIST & THUMB, FINGER SUPPORT

REF-60.419

KNITTED WRIST SUPPORT

S - M - L - XL - XXL  

- It restricts movement in painful wrist conditions and aids in the healing process. This orthosis is utilized in the treatment of carpal tunnel syndrome.

	S	M	L	XL	XXL
	15-17 cm	17-19 cm	19-21 cm	21-23 cm	23-25 cm

REF-60.421

WRIST & THUMB SUPPORT (KNITTED)

- It helps in the healing process by restricting movement in painful conditions of the wrist and thumb. This orthosis is employed in the treatment of carpal tunnel syndrome.

REF-60.422

WRIST SUPPORT (KNITTED)

- It offers movement restriction in painful conditions of the wrist and contributes to the healing process.

REF-60.015

THUMB SPLINT

- It restricts the movement of the thumb joints (MP and CMC) and provides external support.
- It is used for thumb ligament problems, tendon lesions (De Quervain's Tendinitis, etc.), sprains, and injuries (skier's thumb, etc.).

S
-

REF-60.604

WRIST & THUMB SUPPORT

- It restricts thumb joint movement while offering external support.
- This orthosis is utilized in De Quervain's syndrome and cases of thumb ligament problems.
- It stabilizes the thumb with its aluminum support, providing effective wrist fixation.

REF-61.033

STATIC WRIST ORTHOSIS

- It provides immobilization of the wrist, preventing ulnar and radial rotations.
- It is used to rest the wrist against pain or during the recovery period after the use of plaster in fractures.

REF-61.034

STATIC HAND ORTHOSIS

- It provides a resting position for the wrist by keeping it in 30 degrees of dorsiflexion and slightly flexing the IP joints.
- This orthosis is employed in cases of fracture, post-cast positioning, and peripheral nerve injuries affecting the wrist and fingers.

REF-61.035

**STATIC HAND ORTHOSIS
(WITH FINGER)**

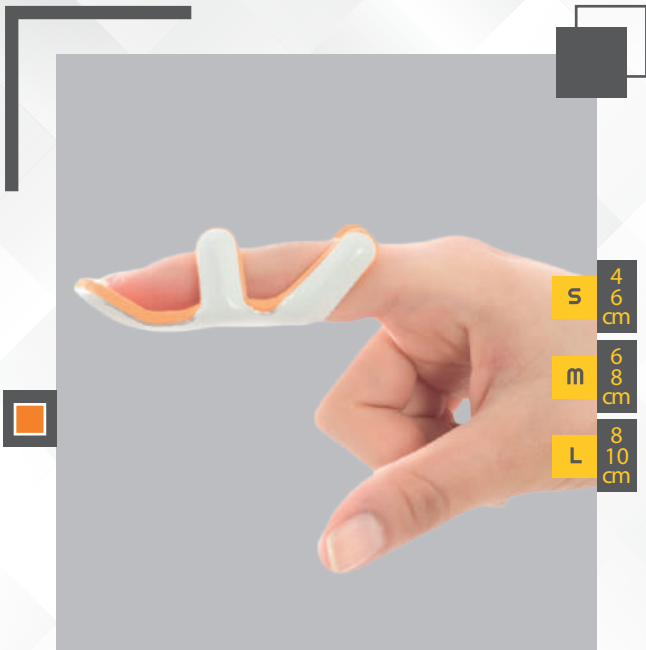

- It provides a resting position for the wrist by maintaining it in 30 degrees of dorsiflexion and slightly flexing the IP joints.
- This orthosis is utilized to prevent rheumatoid arthritis and contracture.

REF-61.040

DYNAMIC HAND ORTHOSIS

- It is used to exercise the fingers in cases where the movements of the fingers are limited after Cerebral Palsy, Distal Radius/Ulna, Multiple Sclerosis (MS), muscular dystrophy, paralysis and tendon or ligament operations.

REF-64.001

FINGER SPLINT (FROG)

- It maintains both interphalangeal joints in their natural functional position and ensures the immobilization of the finger in extension.

REF-64.002

FINGER SPLINT (BASEBALL)

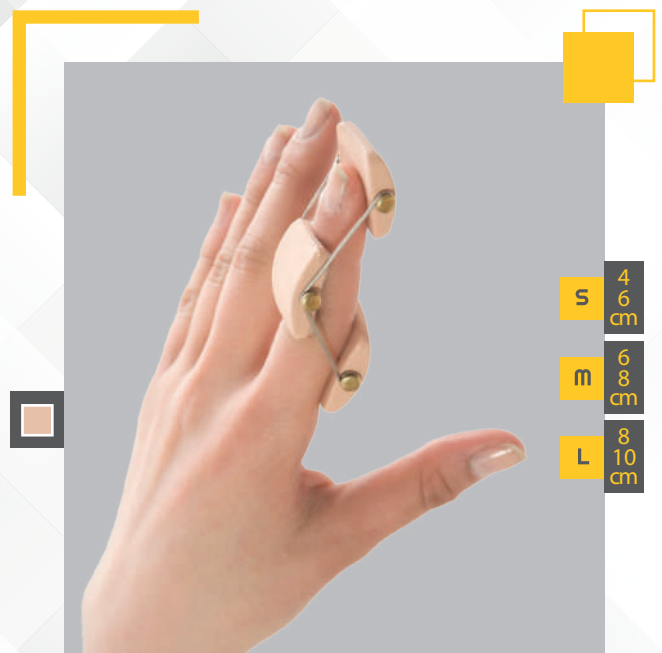

- It is employed to maintain the interphalangeal joints in the correct position following distal joint injuries.
- Additionally, it can be adjusted to accommodate different finger lengths and thicknesses.

REF-64.003

FINGER SPLINT (ALUMINIUM STICK)

- It can be utilized as a finger guard and baseball splint or for transverse fractures of the phalanges.

REF-64.004

FINGER SPLINT (DYNAMIC)

- It provides extension immobilization for the finger and is employed in cases of finger fractures, tendon and nerve injuries, as well as strains and sprains.

morsa
cyberg orthopedic

REF-61.001

FINGER SPLINT (MALLETT FINGER)

- This splint is commonly employed in the treatment of Mallet finger disorder, which arises when the extensor tendon tears or ruptures after involuntary flexion of the distal phalanx.
- It is manufactured by incorporating holes in the plastic material to enhance ventilation.

REF-70.101

INGUINAL RUPTURE BELT

- It is used before and after surgery for hernias in the inguinal region.

REF-70.102

INGUINAL RUPTURE BELT (DOUBLE)

- It is used before and after surgery for hernias in the inguinal region.

REF-70.103

BELLY HERNIA BELT

- For umbilical and abdominal hernias, it supports the hernia by applying pressure with its special pad, preventing the hernia from worsening.

REF-71.021

HIP ORTHOSIS WITH FUNCTIONAL JOINT

- Provides postoperative protection and stabilization following total hip replacement and revision surgeries.
- Recommended after femoral head resection.
- Can be applied following correction osteotomy.

REF-80.045/50/55
60/65/70/75

KNEE IMMOBILIZER

- It is used in situations requiring full extension of the knee joint and provides post-operative immobilization after patellar, articular, and collateral ligament operations.

REF-83.010

TELESCOPIC ANGLE ADJUSTABLE KNEE BRACE

- It is designed to offer a protected, controlled range of motion (ROM) for patients with knee injury or instability post-knee surgery.
- With angle adjustment mechanisms that can be limited between 0-120° Flexion and 0-90° Extension, it facilitates controlled ambulation by providing movement restriction at the desired angle.

Adjustable Size

REF-83.011

KNEE BRACE WITH CONTROLLED MECHANISM

- With adjustable angle joints on the sides, it offers the desired degree of flexion or extension control of the knee.
- It provides excellent support following ACL and PCL operations, as well as in situations requiring control and protection.

Adjustable Size

REF-83.012

KNEE BRACE WITH CONTROLLED MECHANISM (MOVING LENGTH)

- Provides adjustable movement restriction in the knee to the desired extent.
- Offers excellent support to the ACL in situations requiring control and protection after PCL operations.
- With angle-adjustable joints on the sides, it enables precise control of knee flexion or extension to the desired degree.

Adjustable Size

REF-83.014

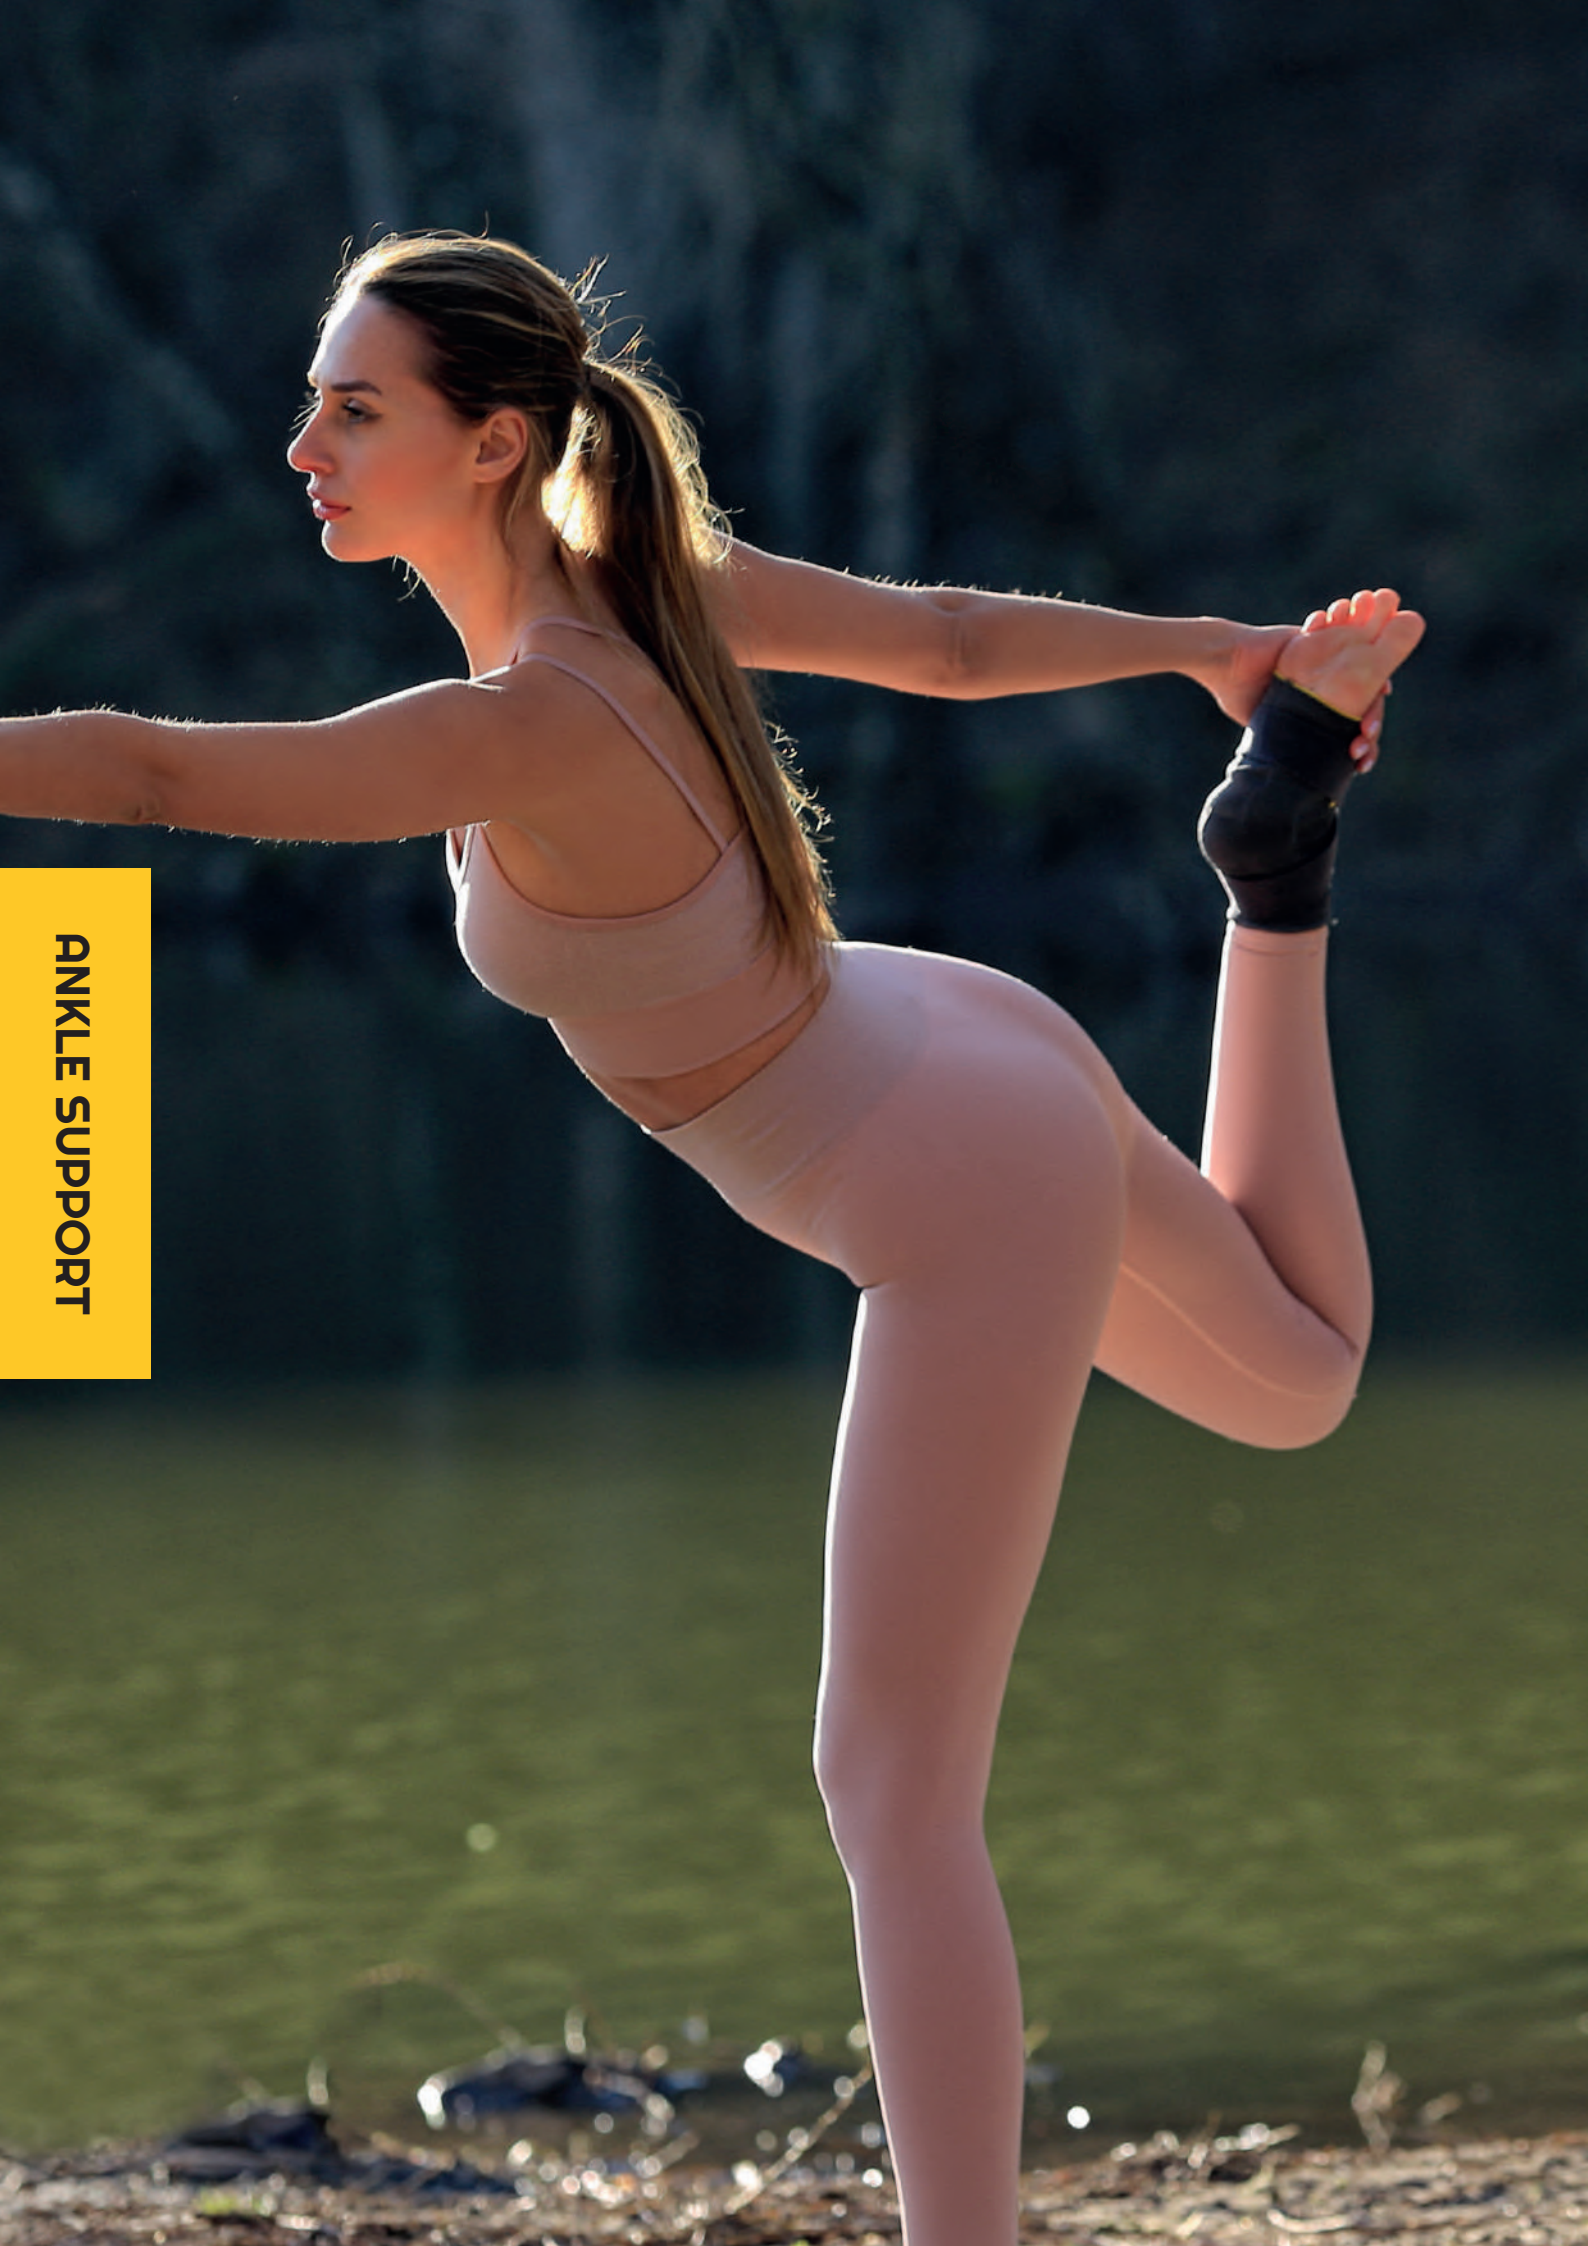

MULTI KNEE BRACE

- In cases of gonarthrosis (varus or valgus deformity), it assists in straightening the knee axis in the narrowed knee compartment.
- Additionally, after ACL and PCL operations, it offers excellent support to the knee in situations requiring control and protection.

INSOLES & FOOTCARE

REF-100.030

HALLUX VALGUS SPLINT (NIGHT)

- This product helps the big toe stay in the correct position and supports the treatment of hallux valgus.

REF-100.032

HALLUX VALGUS SPLINT (DAY)

- This product helps the big toe stay in the correct position and supports the treatment of hallux valgus.

REF-105.230

SILICONE PROSTHETIC BREAST

- Silicone breast prosthesis is a prosthesis designed to closely resemble a real breast and can mimic the natural movements of your body.
- It is commonly used by individuals who have undergone mastectomy operations to restore the appearance of the breast.

REF-105.231

BREAST PROSTHESIS BRA

- With the pockets on both sides, the silicone breast prosthesis can be easily inserted and secured in place within a mastectomy bra or specialized pocketed clothing, providing a comfortable and natural fit for the wearer.

REF-105.246

SILICON METATARSAL CUSHION WITH FABRIC

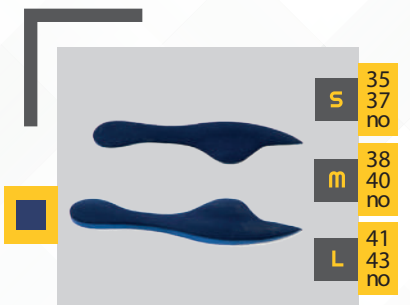

- It is placed transversely proximal to the metatarsal heads.
- It reduces the pain by relieving the pressure on the metatarsal heads.

REF-105.247

SILICONE HEEL CUSHION WITH FABRIC

- This orthosis provides relief in cases of heel spurs (epin calcaneus) and Achilles tendon irritations due to its relaxing properties.

REF-105.248

INTERNAL-EXTERNAL WEDGE

- This orthosis provides a wedge (elevation) from the medial or lateral surface when placed in the shoe, addressing issues where the sole of the foot presses inward or outward.

REF-105.249

SILICONE INSOLES WITH FABRIC

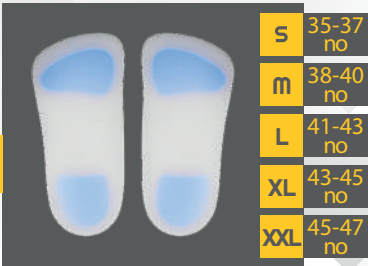

- By providing anatomical support to the sole of the foot, it ensures a balanced distribution of the pressure on the sole.
- It helps in relieving pain caused by disorders such as low soles (pes planus).

REF-105.250

SILICONE INSOLES

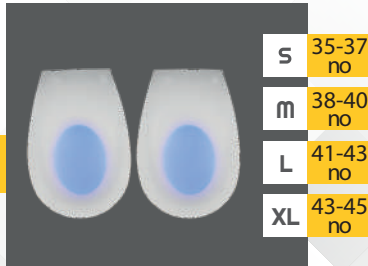

- By providing anatomical support to the sole, it ensures a balanced distribution of pressure on the sole.

REF-105.251

SILICONE INSOLES 3/4

- By providing anatomical support to the sole, it ensures a balanced distribution of pressure on the sole.

REF-105.252

SILICONE HEEL CUSHION

- It possesses soothing properties for heel spurs (plantar fasciitis) and irritations of the Achilles tendon.

REF-105.253

SILICONE ARCH SUPPORT WITH FABRIC

- It reduces the increased tension on the longitudinal arch by providing support. With its adhesive feature, it can be easily fixed inside the shoe.

REF-105.254

SILICONE TOE SEPERATOR

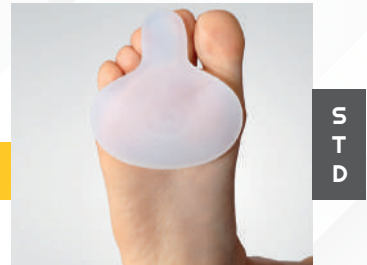

- It aids the proper alignment of the big toe, particularly within shoes, correcting any misalignment issues.

REF-105.255

METATARSAL PAD

- It offers support to the metatarsal arch, addressing biomechanical issues such as metatarsal collapse, particularly at the metatarsal heads.

REF-105.260

SILICONE METATARSAL PAD WITH FABRIC

- When positioned between the toes, it provides support to the metatarsal region. It's commonly employed to alleviate sensitivity and conditions like metatarsalgia.

REF-105.261

SILICONE METATARSAL PAD WITH RING

- It offers support to the metatarsal region when inserted between the toes. It's utilized to alleviate sensitivity in the metatarsal head and address metatarsalgia disorders.

REF-105.262

SILICONE BUNION PROTECTOR

- It assists in shielding the bunion from shoe pressure and alleviates callused areas. Additionally, it aids in the treatment of hallux valgus.

REF-105.263

SILICONE CUSHION HAMMER TOE

- It shields and alleviates discomfort in hammer toe, preventing excessive bending of the affected finger.

REF-105.264

SILICONE FINGER SLEEVE

- It assists in alleviating pain and pressure sensations caused by calluses or deformations.

REF-105.267

SILICONE BUNION PROTECTOR WITH ROLLER

- It prevents the progression of hallux valgus deformity by separating the toes with the roller part, while the bunion protector part helps alleviate pain.

REF-106.246

INSOLES 3/4 (HARD FOAM)

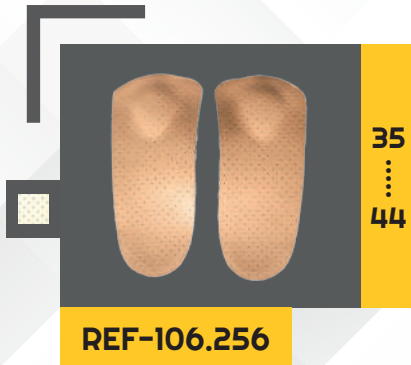

- Provides anatomical support to the base of the foot, balancing pressure. 3/4 size fits comfortably in shoes. Made from medium-hard EVA material.

REF-106.248

INSOLES ARC REINFORCED INSOLES (EVA)

- With its design featuring space around the heel area, it aids in addressing discomfort in the heel region.

REF-106.256

INSOLES FLEXIBLE 3/4

- It offers complete support to the sole of the foot in cases of pes cavus and pes planus, while also massaging the sole muscles with its flexible feature.

REF-106.257

INSOLES STEEL BROWN

- With a steel bridge, it provides firm support to the sole of the foot in cases of Pes planus and Pes cavus deformities.

REF-106.258

INSOLES CORK BROWN

- While providing anatomical adaptation to the sole of the foot, it also offers transverse arch support.

REF-110.431

**LOW COMPRESSION
VARICOSE SOCKS (CCLI-CALF)**

- It prevents the formation of varicose veins in the legs and promotes blood circulation by applying compression to the initial varicose veins.
- It exerts a pressure of 18 – 21 mm Hg.

REF-110.432

**LOW COMPRESSION
VARICOSE SOCKS (CCLI-THIGH)**

- It helps prevent the development of varicose veins in the legs and promotes blood circulation by applying compression to the initial varicose veins in the legs and calves.
- It exerts a pressure of 18 to 21 mm Hg.

REF-110.433

**LOW COMPRESSION
VARICOSE SOCKS (CCLI-PANTYHOSE)**

- It is employed to deter the development of varicose veins in the legs, aiding blood circulation through compression applied to the initial varicose veins in the legs and calves.
- It exerts a pressure of 18 to 21 mm Hg.

REF-110.434

**LOW COMPRESSION
VARICOSE SOCKS (CCLI-PREGNANCY)**

- It promotes blood circulation and alleviates varicose pain during pregnancy by applying compression to the leg and calf area.
- Particularly beneficial for expectant mothers, it addresses the discomfort and pain associated with varicose veins during pregnancy.
- It exerts a pressure of 18 to 21 mm Hg.

REF-110.531

MEDIUM COMPRESSION VARICOSE SOCKS (CCL2-CALF)

- It is utilized in the treatment of moderate varicose veins, promoting blood circulation through compression.
- It applies pressure ranging from 23 to 32 mm Hg.

REF-110.532

MEDIUM COMPRESSION VARICOSE SOCKS (CCL2-THIGH)

- It is employed in treating moderate varicose veins, aiding blood circulation by applying compression to the legs and calves.
- It applies pressure ranging from 23 to 32 mm Hg.

REF-110.533

MEDIUM COMPRESSION VARICOSE SOCKS (CCL2-PANTYHOSE)

- During the treatment of moderate varicose veins, it facilitates blood circulation by administering compression to the leg and calf,
- Applying a pressure ranging from 23 to 32 mm Hg.

REF-110.534

MEDIUM COMPRESSION VARICOSE SOCKS (CCL2-PREGNANCY)

- It aids in the treatment of varicose veins experienced during pregnancy by promoting blood circulation through compression applied to the leg and calf area.
- Particularly beneficial for expectant mothers, it addresses the discomfort and pain associated with varicose veins during pregnancy.
- It exerts a pressure of 23 to 32 mm Hg.

REF-110.631

HIGH COMPRESSION VARICOSE SOCKS (CCL3-CALF)

- It is employed in the treatment of severe varicose veins, facilitating blood circulation through compression.
- It exerts pressure ranging from 34 to 46 mm Hg.

REF-110.632

HIGH COMPRESSION VARICOSE SOCKS (CCL3-THIGH)

- It is utilized in the treatment of severe varicose veins, facilitating blood circulation through compression applied to the leg and calf.
- It exerts a pressure of 34 to 46 mm Hg.

REF-110.633

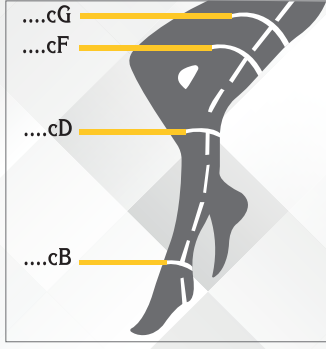

HIGH COMPRESSION VARICOSE SOCKS (CCL3-PANTYHOSE)

- In the treatment of severe varicose veins, it aids blood circulation through compression applied to the leg and calf, exerting a pressure of 34 to 46 mm Hg.

REF-110.634

HIGH COMPRESSION VARICOSE SOCKS (CCL3-PREGNANCY)

- In the treatment of high-level varicose veins experienced during pregnancy, it facilitates blood circulation by applying compression to the leg and calf area.
- Especially beneficial for expectant mothers, it addresses the discomfort and pain associated with varicose veins during pregnancy.
- It exerts a pressure of 34 to 46 mm Hg.

REF-133.002

DENNIS BROWN ORTHOSIS WITH SHOE

- Dennis Brown boots, specially designed for children with Perthes disease (PEV), are utilized post-hip dislocation surgery.
- The special hole in the heel area allows for easy observation of the harmony between the foot and the boot.

PILLOW AND ALUMINIUM PRODUCTS

REF-142.120

PILLOW NECK

- It can be used for conditions such as neck flattening, neck hernia, canal stenosis, intervertebral problems, chronic head and neck pain, snoring, and disturbed sleep, all of which may reduce sleep quality.

REF-142.125

PILLOW TRAVEL

- It offers a comfortable travel experience by fully wrapping around the neck.
- Additionally, its zippered cover allows for easy cleaning.

REF-142.101

PILLOW BACK

- Thanks to its anatomical desing, it fully supports the lumbar region.
- It supports the spine and helps it stay upright and straight.

REF-142.110

PILLOW CUSHION SET

- This product provides comfort and relief for coccyx traumas, hematoma, and decubitus.

REF-142.112

PATIENT ROTATION PILLOW

- Made of 22 DNS sponges, this product facilitates easy rotation and movement for patients who are unable to move on their own.

REF-142.130

PILLOW TRAVEL REFLUX

- The reflux pillow is designed to alleviate symptoms of acid reflux.

REF-154.101

WALKER ALUMINIUM

- Specifically designed for seniors or those with difficulty walking, this product provides assistance in standing and walking, while offering extra security with its non-slip feet.

REF-154.102

CRUTCH ALUMINIUM (PAIR)

- Crutches are used to assist mobility by transferring force from the arms when a person's movements are restricted due to discomfort.

REF-154.103

CANADIAN ALUMINIUM (PAIR)

- The Aluminum Canadian crutch is utilized to support the legs with force from the arms when a person's movements are restricted due to discomfort.

REF-154.104

TRIPOD ALUMINIUM

- It is designed to help users walk in a balanced manner despite any discomfort.

REF-154.105

WALKING STICK ALUMINIUM

- The walking stick provides support to the user due to factors such as old age or discomfort.

REF-154.106

CLOSET PORTABLE

- The toilet seat riser product is adjustable and foldable, with a backrest included.
- It is extremely easy and convenient to use and clean.
